

Dear Co-Chairs Holvey,

Hi,

I'm sorry for not mentioning about business here. What I'm most concerning about now is the number of infected cases keeps increasing!...

As you know that it takes 14 days for symptoms to show. So, why wait until people are already sick to wear masks? Within those 14 days, these people let go their viruses freely to many other healthy people without knowing. I'm Vietnamese. I listen to news from Vietnam. People HAVE to wear masks to public. So far, they have 81 positive cases even though Vietnam is next to China. Our cases here are increasing rapidly! Can I ask you to consider about suggesting people to start to wear masks now please? DON'T WAIT UNTIL TOO LATE! Wearing masks now, for both healthy and sick can prevent both sides. If you're sick, mask stops your viruses and if you're not sick, it's much or little helping you from facing the sick... Please consider this and speak up! I normally believe and listen to experts.. But this time is hard! I left home for work at our grocery store, Facing lots of people. Couldn't tell who was sick, who was not! I came home every night with a nervous feeling. Am I bringing the virus home? I am not sure!

I hope that my concerns can be heard!

Is there a way to share this to the experts?

Please ACT BEFORE TOO LATE!

Thanks,

Sincerely,

Vien To
