

Dear Co-Chairs Holvey,

As a business manager. I am writing today to share the impacts the current COVID-19 health crisis is having on business, employees and my family.

There is panic. People do not want to go to work and spread this. The lack of testing has made our state and county numbers much lower than the reality. The owners of the company I work for will not shut down unless forced. There is a mentality that it's not that bad, look at our numbers. The big problem is our numbers are really much higher. Please fix this if you want business to make better and informed decisions.

Sincerely,

Loralee Paulson
