

We are landlords and we are retired and depend on income from our rentals to buy food and other sustainable items such as Pay for our medication. I am 68 and husband is 78. We are worried about how we're going to cover our mortgage, utilities, landscapers. There should be some benefits for landlords.

I'm not sure how you are going to make sure that the people that are still receiving a paycheck, working from home etc. don't automatically not pay rent and receive this benefit. I think only the people that have lost their jobs should be eligible for this benefit. There should be a application submitted from the tenants showing there is a need.

Please make sure that you look at all the corners and take care of all your citizens.
