

As a person of color I believe this is extremely important to pass. I have been treated unfairly, given dirty looks and have had racial slurs yelled at me. Children and adults need to be educated on the disgusting racist history of this country and the hatred that is still alive today. Why is learning the truth about what people of color went through even a question? It is alarming to me that there's even an option to say no. If this does not pass it will be even clearer to me that once again POC mean nothing to white people. We have been silenced forever and it's time for change. How many more POC need to be murdered and broken down before you guys DO SOMETHING?
