16 producer or biomass collector transfers biomass to a biofuel producer.

17 (3) The amount of the credit shall be calculated as follows:

18 (a) Determine the quantity of biomass transferred to a biofuel producer during the tax
19 year;

20 (b) Categorize the biomass into appropriate categories; and

23

24 **SECTION 33.** ORS 469.320 is amended to read:

25 469.320. (1) Except as provided in subsections (2) and (5) of this section, no facility shall be
26 constructed or expanded unless a site certificate has been issued for the site thereof in the manner
27 provided in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992. No facility shall be
28 constructed or operated except in conformity with the requirements of ORS 469.300 to 469.563,
29 469.590 to 469.619, 469.930 and 469.992.

30 (2) A site certificate is not required for:

31 (a) An energy facility for which no site certificate has been issued that, on August 2, 1993, had
32 operable electric generating equipment for a modification that uses the same fuel type and increases
33 electric generating capacity, if:

34 (A) The site is not enlarged; and

35 (B) The ability of the energy facility to use fuel for electricity production under peak steady
36 state operating conditions is not more than 200 million Btu per hour greater than it was on August
37 2, 1993, or the energy facility expansion is called for in the short-term plan of action of an energy
38 resource plan that has been acknowledged by the Public Utility Commission of Oregon.

39 (b) Construction or expansion of any interstate natural gas pipeline or associated underground
40 natural gas storage facility authorized by and subject to the continuing regulation of the Federal
41 Energy Regulatory Commission or successor agency.

42 (c) An energy facility, except coal and nuclear power plants, if the energy facility:

43 (A) Sequentially produces electrical energy and useful thermal energy from the same fuel source;
44 and

45 (B) Under normal operating conditions, has a useful thermal energy output of no less than 33

1 percent of the total energy output or the fuel chargeable to power heat rate value is not greater
2 than 6,000 Btu per kilowatt hour.

3 (d) Temporary storage, at the site of a nuclear-fueled thermal power plant for which a site cer-
4 tificate has been issued by the State of Oregon, of radioactive waste from the plant.

5 (e) An energy facility as defined in ORS 469.300 (11)(a)(G), if the plant also produces a secondary
6 fuel used on site for the production of heat or electricity, if the output of the primary fuel is less
7 than six billion Btu of heat a day.

8 (f) An energy facility as defined in ORS 469.300 (11)(a)(G), if the facility:

9 (A) Exclusively uses **biomass, including but not limited to** grain, whey, potatoes, oil seeds,
10 waste vegetable oil or cellulosic biomass, as the source of material for conversion to a liquid fuel;

11 (B) Has received local land use approval under the applicable acknowledged comprehensive plan
12 and land use regulations of the affected local government and the facility complies with any state-
13 wide planning goals or rules of the Land Conservation and Development Commission that are di-
14 rectly applicable to the facility;

28 as having complied with all applicable air and water quality requirements. For an applicant that
29 proposes to provide the physical facilities for the installation of standby generators, the requirement
30 of this subparagraph may be met by agreeing to require such a term in the lease contract for the
31 facility; and

32 (C) The standby generators are electrically incapable of being interconnected to the trans-
33 mission grid. For an applicant that proposes to provide the physical facilities for the installation of
34 standby generators, the requirement of this subparagraph may be met by agreeing to require such
35 a term in the lease contract for the facility.

36 (3) The Energy Facility Siting Council may review and, if necessary, revise the fuel chargeable
37 to power heat rate value set forth in subsection (2)(c)(B) of this section. In making its determination,
38 the council shall ensure that the fuel chargeable to power heat rate value for facilities set forth in
39 subsection (2)(c)(B) of this section remains significantly lower than the fuel chargeable to power
40 heat rate value for the best available, commercially viable thermal power plant technology at the
41 time of the revision.

43 emption under subsection (2)(a), (c), (f) or (g) of this section from the requirement to obtain a site
44 certificate shall request the Energy Facility Siting Council to determine whether the proposed fa-
45 cility qualifies for the claimed exemption. The council shall make its determination within 60 days

1 after the request for exemption is filed. An appeal from the council’s determination on a request for
2 exemption shall be made under ORS 469.403, except that the scope of review by the Supreme Court
3 shall be the same as a review by a circuit court under ORS 183.484. The record on review by the
4 Supreme Court shall be the record established in the council proceeding on the exemption.

5 (5) Notwithstanding subsection (1) of this section, a separate site certificate shall not be re-
6 quired for:

7 (a) Transmission lines, storage facilities, pipelines or similar related or supporting facilities, if
8 such related or supporting facilities are addressed in and are subject to a site certificate for another
9 energy facility;

10 (b) Expansion within the site or within the energy generation area of a facility for which a site
11 certificate has been issued, if the existing site certificate has been amended to authorize expansion;
12 or

13 (c) Expansion, either within the site or outside the site, of an existing council certified surface
14 facility related to an underground gas storage reservoir, if the existing site certificate is amended
15 to authorize expansion.

16 (6) If the substantial loss of the steam host causes a facility exempt under subsection (2)(c) of
17 this section to substantially fail to meet the exemption requirements under subsection (2)(c) of this
18 section, the electric generating facility shall cease to operate one year after the substantial loss of
19 the steam host unless an application for a site certificate has been filed in accordance with the
20 provisions of ORS 469.300 to 469.563.

21 (7) As used in this section:

22 (a) “Standby generation facility” means an electric power generating facility, including standby
23 generators and the physical structures necessary to install and connect standby generators, that
24 provides temporary electric power in the event of a power outage and that is electrically incapable
25 of being interconnected with the transmission grid.

26 (b) “Total energy output” means the sum of useful thermal energy output and useful electrical
27 energy output.

28 (c) “Useful thermal energy” means the verifiable thermal energy used in any viable industrial
29 or commercial process, heating or cooling application.

31 power generating plant with an average electric generating capacity of less than 35 megawatts
32 produced from wind energy at a single energy facility or within a single energy generation area may
33 elect to obtain a site certificate in the manner provided in ORS 469.300 to 469.563, 469.590 to
34 469.619, 469.930 and 469.992. An election to obtain a site certificate under this subsection shall be
35 final upon submission of an application for a site certificate.
