

# House Bill 3445

Sponsored by COMMITTEE ON RULES (at the request of Stephen Kafoury)

## SUMMARY

The following summary is not prepared by the sponsors of the measure and is not a part of the body thereof subject to consideration by the Legislative Assembly. It is an editor's brief statement of the essential features of the measure **as introduced**.

Requires energy facilities producing power from wind energy to be sited pursuant to energy facility site certificate without regard to amount of power generated.

## A BILL FOR AN ACT

1  
2 Relating to alternative energy; creating new provisions; and amending ORS 469.300 and 469.320.

3 **Be It Enacted by the People of the State of Oregon:**

4 **SECTION 1.** ORS 469.300 is amended to read:

5 469.300. As used in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992, unless the  
6 context requires otherwise:

7 (1) "Applicant" means any person who makes application for a site certificate in the manner  
8 provided in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992.

9 (2) "Application" means a request for approval of a particular site or sites for the construction  
10 and operation of an energy facility or the construction and operation of an additional energy facility  
11 upon a site for which a certificate has already been issued, filed in accordance with the procedures  
12 established pursuant to ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992.

13 (3) "Associated transmission lines" means new transmission lines constructed to connect an en-  
14 ergy facility to the first point of junction of such transmission line or lines with either a power  
15 distribution system or an interconnected primary transmission system or both or to the Northwest  
16 Power Grid.

17 (4) "Average electric generating capacity" means the peak generating capacity of the facility  
18 divided by one of the following factors:

19 (a) For wind or solar energy facilities, 3.00;

20 (b) For geothermal energy facilities, 1.11; or

21 (c) For all other energy facilities, 1.00.

22 (5) "Combustion turbine power plant" means a thermal power plant consisting of one or more  
23 fuel-fired combustion turbines and any associated waste heat combined cycle generators.

24 (6) "Construction" means work performed on a site, excluding surveying, exploration or other  
25 activities to define or characterize the site, the cost of which exceeds \$250,000.

26 (7) "Council" means the Energy Facility Siting Council established under ORS 469.450.

27 (8) "Department" means the State Department of Energy created under ORS 469.030.

28 (9) "Director" means the Director of the State Department of Energy appointed under ORS  
29 469.040.

30 (10) "Electric utility" means persons, regulated electrical companies, people's utility districts,  
31 joint operating agencies, electric cooperatives, municipalities or any combination thereof, engaged

**NOTE:** Matter in **boldfaced** type in an amended section is new; matter *[italic and bracketed]* is existing law to be omitted.  
New sections are in **boldfaced** type.

1 in or authorized to engage in the business of generating, supplying, transmitting or distributing  
 2 electric energy.

3 (11)(a) "Energy facility" means any of the following:

4 (A) An electric power generating plant with a nominal electric generating capacity of 25 mega-  
 5 watts or more, including but not limited to:

6 (i) Thermal power; or

7 (ii) Combustion turbine power plant.

8 (B) A nuclear installation as defined in this section.

9 (C) A high voltage transmission line of more than 10 miles in length with a capacity of 230,000  
 10 volts or more to be constructed in more than one city or county in this state, but excluding:

11 (i) Lines proposed for construction entirely within 500 feet of an existing corridor occupied by  
 12 high voltage transmission lines with a capacity of 230,000 volts or more; and

13 (ii) Lines of 57,000 volts or more that are rebuilt and upgraded to 230,000 volts along the same  
 14 right of way.

15 (D) A solar collecting facility using more than 100 acres of land.

16 (E) A pipeline that is:

17 (i) At least six inches in diameter, and five or more miles in length, used for the transportation  
 18 of crude petroleum or a derivative thereof, liquefied natural gas, a geothermal energy form in a  
 19 liquid state or other fossil energy resource, excluding a pipeline conveying natural or synthetic gas;

20 (ii) At least 16 inches in diameter, and five or more miles in length, used for the transportation  
 21 of natural or synthetic gas, but excluding:

22 (I) A pipeline proposed for construction of which less than five miles of the pipeline is more than  
 23 50 feet from a public road, as defined in ORS 368.001; or

24 (II) A parallel or upgraded pipeline up to 24 inches in diameter that is constructed within the  
 25 same right of way as an existing 16-inch or larger pipeline that has a site certificate, if all studies  
 26 and necessary mitigation conducted for the existing site certificate meet or are updated to meet  
 27 current site certificate standards; or

28 (iii) At least 16 inches in diameter and five or more miles in length used to carry a geothermal  
 29 energy form in a gaseous state but excluding a pipeline used to distribute heat within a geothermal  
 30 heating district established under ORS chapter 523.

31 (F) A synthetic fuel plant which converts a natural resource including, but not limited to, coal  
 32 or oil to a gas, liquid or solid product intended to be used as a fuel and capable of being burned to  
 33 produce the equivalent of two billion Btu of heat a day.

34 (G) A plant which converts biomass to a gas, liquid or solid product, or combination of such  
 35 products, intended to be used as a fuel and if any one of such products is capable of being burned  
 36 to produce the equivalent of six billion Btu of heat a day.

37 (H) A storage facility for liquefied natural gas constructed after September 29, 1991, that is de-  
 38 signed to hold at least 70,000 gallons.

39 (I) A surface facility related to an underground gas storage reservoir that, at design injection  
 40 or withdrawal rates, will receive or deliver more than 50 million cubic feet of natural or synthetic  
 41 gas per day, or require more than 4,000 horsepower of natural gas compression to operate, but ex-  
 42 cluding:

43 (i) The underground storage reservoir;

44 (ii) The injection, withdrawal or monitoring wells and individual wellhead equipment; and

45 (iii) An underground gas storage reservoir into which gas is injected solely for testing or res-

1 ervoir maintenance purposes or to facilitate the secondary recovery of oil or other hydrocarbons.

2 (J) An electric power generating plant with an average electric generating capacity of 35  
3 megawatts or more if the power is produced from geothermal[,] or solar [*or wind*] energy at a single  
4 energy facility or within a single energy generation area.

5 **(K) An electric power generating plant with any electric generating capacity if the power**  
6 **is produced from wind energy at a single energy facility or within a single energy generation**  
7 **area.**

8 (b) "Energy facility" does not include a hydroelectric facility.

9 (12) "Energy generation area" means an area within which the effects of two or more small  
10 generating plants may accumulate so the small generating plants have effects of a magnitude similar  
11 to a single generating plant of 35 megawatts average electric generating capacity or more. An "en-  
12 ergy generation area" for facilities using a geothermal resource and covered by a unit agreement,  
13 as provided in ORS 522.405 to 522.545 or by federal law, shall be defined in that unit agreement. If  
14 no such unit agreement exists, an energy generation area for facilities using a geothermal resource  
15 shall be the area that is within two miles, measured from the electrical generating equipment of the  
16 facility, of an existing or proposed geothermal electric power generating plant, not including the site  
17 of any other such plant not owned or controlled by the same person.

18 (13) "Extraordinary nuclear occurrence" means any event causing a discharge or dispersal of  
19 source material, special nuclear material or by-product material as those terms are defined in ORS  
20 453.605, from its intended place of confinement off-site, or causing radiation levels off-site, that the  
21 United States Nuclear Regulatory Commission or its successor determines to be substantial and to  
22 have resulted in or to be likely to result in substantial damages to persons or property off-site.

23 (14) "Facility" means an energy facility together with any related or supporting facilities.

24 (15) "Geothermal reservoir" means an aquifer or aquifers containing a common geothermal fluid.

25 (16) "Local government" means a city or county.

26 (17) "Nominal electric generating capacity" means the maximum net electric power output of  
27 an energy facility based on the average temperature, barometric pressure and relative humidity at  
28 the site during the times of the year when the facility is intended to operate.

29 (18) "Nuclear incident" means any occurrence, including an extraordinary nuclear occurrence,  
30 that results in bodily injury, sickness, disease, death, loss of or damage to property or loss of use  
31 of property due to the radioactive, toxic, explosive or other hazardous properties of source material,  
32 special nuclear material or by-product material as those terms are defined in ORS 453.605.

33 (19) "Nuclear installation" means any power reactor, nuclear fuel fabrication plant, nuclear fuel  
34 reprocessing plant, waste disposal facility for radioactive waste, and any facility handling that  
35 quantity of fissionable materials sufficient to form a critical mass. "Nuclear installation" does not  
36 include any such facilities that are part of a thermal power plant.

37 (20) "Nuclear power plant" means an electrical or any other facility using nuclear energy with  
38 a nominal electric generating capacity of 25 megawatts or more, for generation and distribution of  
39 electricity, and associated transmission lines.

40 (21) "Person" means an individual, partnership, joint venture, private or public corporation, as-  
41 sociation, firm, public service company, political subdivision, municipal corporation, government  
42 agency, people's utility district, or any other entity, public or private, however organized.

43 (22) "Project order" means the order, including any amendments, issued by the State Department  
44 of Energy under ORS 469.330.

45 (23)(a) "Radioactive waste" means all material which is discarded, unwanted or has no present

1 lawful economic use, and contains mined or refined naturally occurring isotopes, accelerator  
 2 produced isotopes and by-product material, source material or special nuclear material as those  
 3 terms are defined in ORS 453.605. The term does not include those radioactive materials identified  
 4 in OAR 345-50-020, 345-50-025 and 345-50-035, adopted by the council on December 12, 1978, and re-  
 5 vised periodically for the purpose of adding additional isotopes which are not referred to in OAR  
 6 345-50 as presenting no significant danger to the public health and safety.

7 (b) Notwithstanding paragraph (a) of this subsection, “radioactive waste” does not include ura-  
 8 nium mine overburden or uranium mill tailings, mill wastes or mill by-product materials as those  
 9 terms are defined in Title 42, United States Code, section 2014, on June 25, 1979.

10 (24) “Related or supporting facilities” means any structure, proposed by the applicant, to be  
 11 constructed or substantially modified in connection with the construction of an energy facility, in-  
 12 cluding associated transmission lines, reservoirs, storage facilities, intake structures, road and rail  
 13 access, pipelines, barge basins, office or public buildings, and commercial and industrial structures.  
 14 “Related or supporting facilities” does not include geothermal or underground gas storage reser-  
 15 voirs, production, injection or monitoring wells or wellhead equipment or pumps.

16 (25) “Site” means any proposed location of an energy facility and related or supporting facilities.

17 (26) “Site certificate” means the binding agreement between the State of Oregon and the appli-  
 18 cant, authorizing the applicant to construct and operate a facility on an approved site, incorporating  
 19 all conditions imposed by the council on the applicant.

20 (27) “Thermal power plant” means an electrical facility using any source of thermal energy with  
 21 a nominal electric generating capacity of 25 megawatts or more, for generation and distribution of  
 22 electricity, and associated transmission lines, including but not limited to a nuclear-fueled,  
 23 geothermal-fueled or fossil-fueled power plant, but not including a portable power plant the principal  
 24 use of which is to supply power in emergencies. “Thermal power plant” includes a nuclear-fueled  
 25 thermal power plant that has ceased to operate.

26 (28) “Transportation” means the transport within the borders of the State of Oregon of radio-  
 27 active material destined for or derived from any location.

28 (29) “Underground gas storage reservoir” means any subsurface sand, strata, formation, aquifer,  
 29 cavern or void, whether natural or artificially created, suitable for the injection, storage and with-  
 30 drawal of natural gas or other gaseous substances. “Underground gas storage reservoir” includes a  
 31 pool as defined in ORS 520.005.

32 (30) “Utility” includes:

33 (a) A person, a regulated electrical company, a people’s utility district, a joint operating agency,  
 34 an electric cooperative, municipality or any combination thereof, engaged in or authorized to engage  
 35 in the business of generating, transmitting or distributing electric energy;

36 (b) A person or public agency generating electric energy from an energy facility for its own  
 37 consumption; and

38 (c) A person engaged in this state in the transmission or distribution of natural or synthetic gas.

39 (31) “Waste disposal facility” means a geographical site in or upon which radioactive waste is  
 40 held or placed but does not include a site at which radioactive waste used or generated pursuant  
 41 to a license granted under ORS 453.635 is stored temporarily, a site of a thermal power plant used  
 42 for the temporary storage of radioactive waste from that plant for which a site certificate has been  
 43 issued pursuant to this chapter or a site used for temporary storage of radioactive waste from a  
 44 reactor operated by a college, university or graduate center for research purposes and not con-  
 45 nected to the Northwest Power Grid. As used in this subsection, “temporary storage” includes

1 storage of radioactive waste on the site of a nuclear-fueled thermal power plant for which a site  
2 certificate has been issued until a permanent storage site is available by the federal government.

3 **SECTION 2.** ORS 469.320 is amended to read:

4 469.320. (1) Except as provided in subsections (2) and (5) of this section, no facility shall be  
5 constructed or expanded unless a site certificate has been issued for the site thereof in the manner  
6 provided in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992. No facility shall be  
7 constructed or operated except in conformity with the requirements of ORS 469.300 to 469.563,  
8 469.590 to 469.619, 469.930 and 469.992.

9 (2) A site certificate is not required for:

10 (a) An energy facility for which no site certificate has been issued that, on August 2, 1993, had  
11 operable electric generating equipment for a modification that uses the same fuel type and increases  
12 electric generating capacity, if:

13 (A) The site is not enlarged; and

14 (B) The ability of the energy facility to use fuel for electricity production under peak steady  
15 state operating conditions is not more than 200 million Btu per hour greater than it was on August  
16 2, 1993, or the energy facility expansion is called for in the short-term plan of action of an energy  
17 resource plan that has been acknowledged by the Public Utility Commission of Oregon.

18 (b) Construction or expansion of any interstate natural gas pipeline or associated underground  
19 natural gas storage facility authorized by and subject to the continuing regulation of the Federal  
20 Energy Regulatory Commission or successor agency.

21 (c) An energy facility, except coal and nuclear power plants, if the energy facility:

22 (A) Sequentially produces electrical energy and useful thermal energy from the same fuel source;  
23 and

24 (B) Under normal operating conditions, has a useful thermal energy output of no less than 33  
25 percent of the total energy output or the fuel chargeable to power heat rate value is not greater  
26 than 6,000 Btu per kilowatt hour.

27 (d) Temporary storage, at the site of a nuclear-fueled thermal power plant for which a site cer-  
28 tificate has been issued by the State of Oregon, of radioactive waste from the plant.

29 (e) An energy facility as defined in ORS 469.300 (11)(a)(G), if the plant also produces a secondary  
30 fuel used on site for the production of heat or electricity, if the output of the primary fuel is less  
31 than six billion Btu of heat a day.

32 (f) An energy facility as defined in ORS 469.300 (11)(a)(G), if the facility:

33 (A) Exclusively uses biomass, including but not limited to grain, whey, potatoes, oil seeds, waste  
34 vegetable oil or cellulosic biomass, as the source of material for conversion to a liquid fuel;

35 (B) Has received local land use approval under the applicable acknowledged comprehensive plan  
36 and land use regulations of the affected local government and the facility complies with any state-  
37 wide planning goals or rules of the Land Conservation and Development Commission that are di-  
38 rectly applicable to the facility;

39 (C) Requires no new electric transmission lines or gas or petroleum product pipelines that would  
40 require a site certificate under subsection (1) of this section;

41 (D) Produces synthetic fuel, at least 90 percent of which is used in an industrial or refueling  
42 facility located within one mile of the facility or is transported from the facility by rail or barge;  
43 and

44 (E) Emits less than 118 pounds of carbon dioxide per million Btu from fossil fuel used for con-  
45 version energy.

1 (g) A standby generation facility, if the facility complies with all of the following:

2 (A) The facility has received local land use approval under the applicable acknowledged com-  
 3 prehensive plan and land use regulations of the affected local government and the facility complies  
 4 with all statewide planning goals and applicable rules of the Land Conservation and Development  
 5 Commission;

6 (B) The standby generators have been approved by the Department of Environmental Quality  
 7 as having complied with all applicable air and water quality requirements. For an applicant that  
 8 proposes to provide the physical facilities for the installation of standby generators, the requirement  
 9 of this subparagraph may be met by agreeing to require such a term in the lease contract for the  
 10 facility; and

11 (C) The standby generators are electrically incapable of being interconnected to the trans-  
 12 mission grid. For an applicant that proposes to provide the physical facilities for the installation of  
 13 standby generators, the requirement of this subparagraph may be met by agreeing to require such  
 14 a term in the lease contract for the facility.

15 (3) The Energy Facility Siting Council may review and, if necessary, revise the fuel chargeable  
 16 to power heat rate value set forth in subsection (2)(c)(B) of this section. In making its determination,  
 17 the council shall ensure that the fuel chargeable to power heat rate value for facilities set forth in  
 18 subsection (2)(c)(B) of this section remains significantly lower than the fuel chargeable to power  
 19 heat rate value for the best available, commercially viable thermal power plant technology at the  
 20 time of the revision.

21 (4) Any person who proposes to construct or enlarge an energy facility and who claims an ex-  
 22 emption under subsection (2)(a), (c), (f) or (g) of this section from the requirement to obtain a site  
 23 certificate shall request the Energy Facility Siting Council to determine whether the proposed fa-  
 24 cility qualifies for the claimed exemption. The council shall make its determination within 60 days  
 25 after the request for exemption is filed. An appeal from the council's determination on a request for  
 26 exemption shall be made under ORS 469.403, except that the scope of review by the Supreme Court  
 27 shall be the same as a review by a circuit court under ORS 183.484. The record on review by the  
 28 Supreme Court shall be the record established in the council proceeding on the exemption.

29 (5) Notwithstanding subsection (1) of this section, a separate site certificate shall not be re-  
 30 quired for:

31 (a) Transmission lines, storage facilities, pipelines or similar related or supporting facilities, if  
 32 such related or supporting facilities are addressed in and are subject to a site certificate for another  
 33 energy facility;

34 (b) Expansion within the site or within the energy generation area of a facility for which a site  
 35 certificate has been issued, if the existing site certificate has been amended to authorize expansion;  
 36 or

37 (c) Expansion, either within the site or outside the site, of an existing council certified surface  
 38 facility related to an underground gas storage reservoir, if the existing site certificate is amended  
 39 to authorize expansion.

40 (6) If the substantial loss of the steam host causes a facility exempt under subsection (2)(c) of  
 41 this section to substantially fail to meet the exemption requirements under subsection (2)(c) of this  
 42 section, the electric generating facility shall cease to operate one year after the substantial loss of  
 43 the steam host unless an application for a site certificate has been filed in accordance with the  
 44 provisions of ORS 469.300 to 469.563.

45 (7) As used in this section:

1 (a) "Standby generation facility" means an electric power generating facility, including standby  
2 generators and the physical structures necessary to install and connect standby generators, that  
3 provides temporary electric power in the event of a power outage and that is electrically incapable  
4 of being interconnected with the transmission grid.

5 (b) "Total energy output" means the sum of useful thermal energy output and useful electrical  
6 energy output.

7 (c) "Useful thermal energy" means the verifiable thermal energy used in any viable industrial  
8 or commercial process, heating or cooling application.

9 *[(8) Notwithstanding the definition of "energy facility" in ORS 469.300 (11)(a)(J), an electric power  
10 generating plant with an average electric generating capacity of less than 35 megawatts produced from  
11 wind energy at a single energy facility or within a single energy generation area may elect to obtain  
12 a site certificate in the manner provided in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and  
13 469.992. An election to obtain a site certificate under this subsection shall be final upon submission of  
14 an application for a site certificate.]*

15 **SECTION 3. The amendments to ORS 469.300 and 469.320 by sections 1 and 2 of this 2009**  
16 **Act apply to applications for a site certificate made for an energy facility producing power**  
17 **from wind energy on or after the effective date of this 2009 Act.**

18
