

Dear Revenue Committee Member,

My education is important to me. When I first came to Yankton, I finally was challenged in my education. I had always got straight A+'s. When I came to Yankton, I finally got my first B. (In 3rd grade) I asked for some help and about a week later, I achieved an A.

Since I've been at Yankton, I noticed that the classes are smaller, and that helps everybody know everybody because we've been together since 3rd grade. Since everybody knows each other, they're nice to each other and there's no judgment.

Yankton has helped me get a better grasp on life and how things work. I've learned about economy and politics, really life in general. Since I've experienced Yankton's learning system, I would love to have other kids feel the same exciting rush of learning that I have felt.

My Arthur Academy education
