

Dear Revenue Committee Members,

My Arthur Academy education is valuable to me.

I feel my education is high quality. I can go at my own speed, but still be in a group. I feel like I'm learning more than I did at my other school. All of my subjects now are neither too easy, nor too hard. At my old school, which was not a charter school, but a district school, math was too easy and reading was a little too hard. Also, I will be finishing Algebra 1 this year in sixth grade.

I like the size of the school. I know every one in the school very well. There have been only 5 new students since fourth grade added to my class. Each student gets more individual attention. I believe that the more individual attention a student gets, the more attention they will give to their classwork, leading to more intelligent students.

I also like the uniform. I think it looks professional. It keeps students focused on their work. They don't think about what they're wearing.
