Dear Mr. Garrard,

this is for the hearing if you would be so kind as to use it.

" To whom it may concern,

I am a citizen of the city of Klamath Falls Oregon, and I am concerned, in fact, I am alarmed at the idea that a tax, that is collected for the express use of maintaining the roads is about to be RAIDED by the county for something that is was not intended.

This sets a president of what amounts to fraudulent taxation being legal!!! the road taxes are supposed to be for the road only. we had an election in which the funding of the jail and other services were threatened once again to extort more money out of the tax payers. the tax payers said very loudly NO!!!

Now we have officials and bureaucrats attempting to go around the voters and the law.

I would say that it is literally a conspiracy to commit money laundering, fraud, and misappropriation of funds. All of those things are crimes.

I voted against the levy for the same reason I have before. every time they want more money they threaten public safety. they do not cut parks, or secretary's or any thing else. they threaten the life and safety services.

This is the same city that just spent MILLIONS of Dollars as I understand it to build a new police station. they could have rented or bought a wear house or just moved office equipment into the old armory they completely demolished and rebuilt, and had not a palace but a workable building. I do not think that they need millions of dollars worth the building to do their jobs.

this all being said, why would what would be fraud at best if I did something like this be legal for them to do? collect money for one thing and then not provide the service and do something else with the money???

thank you

Don Doveri
