To whom it may concern:

Lumber Products was founded in Oregon in 1938, and for 73 years we have been supplying building materials to Oregon and 14 other western states through customers like 52nd Avenue Hardware.

In the face of this challenging economy, many of our customers have found creative and innovative ways to build their businesses, and for 52nd Avenue Hardware, this niche has involved supplying products to the film industry for use in set production. The film industry has become a significant market segment for 52nd Avenue, and as a key supplier to them, it is also very important to Lumber Products

We would encourage the State of Oregon to create a welcoming and mutually beneficial environment for the film industry... not just for us and our customers, but to spur growth in our state economy at all levels!
