Page 31, Line 20, "Tax Credit for Transportation Projects"

I am seeking clarification on page 33 Section 48, Line 21 (2)

This paragraph extends the sunset for alt fuel stations, yet earlier....Section 47 has a eventual elimination of tax credits (01/01/2016), declining percentages until the tax credit is eliminated.

- Previously in the BETC, the alt fuel station qualified for a 35% credit.
- I suggest that this credit be carried forward to the proposed sunset in 2018.
- And is there a cap on this tax credit? And does it stand alone or tag along with the balance of Tax Credits for Transportation Projects?
- I will be in attendance on Monday morning.
- Thanks for all you do.
