5 “Whereas the citizens of the State of Oregon rely heavily on an extensive multimodal transpor-  
6 tation system for all aspects of living in a civil society, including economic opportunities, community  
7 engagement, educational opportunities, maintenance of public health, enjoyment of life and disaster  
8 management; and

9 “Whereas Oregon’s multimodal transportation system has 19,128 lane miles of state highways,  
10 26,737 miles of county roads and 10,799 miles of city streets; and

11 “Whereas Oregon depends on fuel taxes for the bulk of the revenue required to preserve,  
12 maintain and modernize the state’s highway system; and

13 “Whereas as an alternative to the fuel tax, Oregon has developed systems with the capability  
14 for participating vehicle operators to pay a vehicle road usage charge based on miles traveled; and

15 “Whereas highly fuel efficient vehicles are now common in the marketplace, the operators of  
16 which pay much lower fuel taxes than the preceding vehicle fleet, and new technologies will con-  
17 tinue to improve fuel efficiencies in these vehicles; and

18 “Whereas among the emerging fleet of highly fuel efficient vehicles are electric motor vehicles  
19 and plug-in hybrid motor vehicles that pay no fuel tax or a small amount; and

20 “Whereas the federal government requires auto manufacturers to introduce a fleet of new vehi-  
21 cles that will meet a corporate average fuel economy standard of 35.5 miles per gallon in 2016; and

22 “Whereas the Legislative Assembly recognizes the potential for applying a new vehicle road  
23 usage charge based on miles traveled for the operation of vehicles that pay less than the median  
24 amount of fuel taxes; and

25 “Whereas the state should develop and deploy a vehicle road usage charge for a small group  
26 of vehicles to ensure operational availability of the charge when the Legislative Assembly finds it  
27 is necessary to expand the number of vehicles paying the charge; and

28 “Whereas the state’s constitutional requirement for cost responsibility requires that a road us-  
29 age charge be applied in a manner that ensures the share of revenues paid for the use of motor  
30 vehicles is fair and proportionate to the costs incurred for the highway system for each class of  
31 vehicle; and

32 “Whereas as a strategy to reduce emissions and protect the environment, Oregon wants to en-  
33 courage market penetration of electric vehicles and other highly fuel efficient vehicles by providing  
34 a transitional rate for a vehicle road usage charge during the early years of introduction into the  
35 marketplace; now, therefore,”.
