CHAPTER

AN ACT

Relating to Oregon Coordinate System for land surveying; creating new provisions; amending ORS 209.130, 209.155, 209.250 and 390.770; repealing ORS 93.320, 93.330, 93.350, 93.360, 93.370 and 93.380; and declaring an emergency.

Be It Enacted by the People of the State of Oregon:

SECTION 1. (1) As used in this section, “Oregon Coordinate System” means a coordinate mapping system, composed of three coordinate projection mapping systems known as:

- (a) The Oregon State Plane Coordinate System of 1927;**
- (b) The Oregon State Plane Coordinate System of 1983; and**
- (c) The Oregon Coordinate Reference System.**

(2) A description of land that contains coordinates associated with the position of a point on a land boundary must:

- (a) Use the Oregon Coordinate System;**
- (b) Use one specified zone and system for the entire description;**
- (c) Include coordinate system datum with epoch and zone designation;**
- (d) Use coordinates established by a survey connection to the National Spatial Reference System;**

(e) Reference a survey of record that reports the accuracy of coordinates at a 95 percent confidence level; and

- (f) Include distances, bearings, areas and other boundary elements.**

(3) The Department of Transportation shall adopt rules implementing the Oregon Coordinate System.

SECTION 2. ORS 209.130 is amended to read:

209.130. (1) In the establishment or reestablishment of a public land survey corner, the county surveyor shall set a monument of durable quality. When a monument cannot be set at the exact corner position or it is not practicable to set a monument, then a witness corner monument shall be set.

(2) Section corners, Donation Land Claim corners, center corners and quarter-section corners shall be witnessed by at least four references. Meander corners, angle point corners or other approved public land survey corners shall be witnessed by at least two references. References shall be of durable quality. All references shall be carefully described, and their bearings and distances noted in the report or on the survey.

(3) For the purpose of providing an additional reference, the county surveyor may, when maintaining or reestablishing survey corners, establish coordinates on public land survey corners using

[an Oregon Coordinate System pursuant to ORS 93.320] **the Oregon Coordinate System, pursuant to section 1 of this 2011 Act**, or another coordinate system, adopted by the appropriate public agency, that can be referenced directly to a geodetic control monument.

SECTION 3. ORS 209.155 is amended to read:

209.155. (1) Notwithstanding ORS 209.150, when a recorded survey monument, other than a public land survey corner, is removed, destroyed or disturbed as a result of construction or reconstruction of a public road, the survey monument does not have to be replaced if:

(a) The original location of the recorded survey monument is within the new right of way; and

(b) The person or public agency responsible for the construction or reconstruction causes a registered professional land surveyor to locate any survey monuments that are subject to removal, destruction or disturbance and to file a map, prior to the beginning of construction, with the county surveyor that identifies all existing recorded monuments, the existing right of way and controlling centerline and the survey control used to comply with this section.

(2) The newly defined right of way may be delineated by either of the following methods:

(a) All control points that define the right of way centerline are monumented or referenced with monuments. The right of way boundary is monumented at all angle points, points of curve, points of tangency and at least every 1,000 feet on long curves and tangents. A survey that identifies the survey control and the new right of way and controlling centerline shall be filed with the county surveyor within 180 days after completion of construction.

(b) A permanent survey control point network is established referencing the new right of way and controlling centerline. The network shall consist of at least three control monuments and must span the length of the project. Each control monument shall be intervisible with at least two other control monuments. At least two monuments on the network must be part of the original control used to locate the monuments described in subsection (1)(b) of this section. A map identifying the control network and the new right of way and controlling centerline shall be filed with the county surveyor within 180 days after completion of construction.

(3) The types of monuments shall be as described in ORS 92.060.

(4) The survey maps required by this section shall comply with ORS 209.250 and any other requirement of law.

(5) For the purpose of complying with subsection (1)(b) of this section, locating a survey monument may consist of establishing coordinates on the monument[. *These coordinates may be Oregon State Plane coordinates*] **using the Oregon Coordinate System pursuant to section 1 of this 2011 Act**, Local Datum Plane coordinates **that scale Oregon State Plane coordinates of the Oregon Coordinate System to a plane close to the ground elevation of a survey project** or other coordinates compatible with those coordinates shown on the survey.

(6) For the purpose of complying with this section, the date of completion of construction [*shall be considered*] **is deemed** to be the date when all substantial road improvements are completed.

SECTION 4. ORS 209.250 is amended to read:

209.250. (1) A registered professional land surveyor making a survey of lands within this state wherein the surveyor establishes or reestablishes a boundary monument shall, within 45 days thereafter, submit for filing a permanent map of the survey to the county surveyor for review. When filed, the map is a permanent public record in the office of the county surveyor. In establishing or reestablishing a public land survey corner, the surveyor shall comply with ORS 209.070 (4), 209.130 and 209.200. If the surveyor is unable to complete the survey and submit a permanent map within 45 days, the surveyor shall, within 45 days of establishing or reestablishing a boundary monument, provide written notice to the county surveyor containing the reasons for the delay, an estimate of the amount of time reasonably necessary to complete the survey but not exceeding 180 days, and a temporary map showing the position of monuments established or reestablished.

(2) The permanent map must have a written narrative that may be on the face of the map. If the narrative is a separate document, the map and narrative must be referenced to each other. The map and narrative must be made on a suitable drafting material in the size required by the county surveyor. The lettering on the map and narrative must be of sufficient size and clarity to be re-

produced clearly. The narrative must explain the purpose of the survey and how the boundary lines or other lines were established or reestablished and must state which deed records, deed elements, survey records, found survey monuments, plat records, road records or other pertinent data were controlling when establishing or reestablishing the lines. If the narrative is a separate document, the narrative must also contain the following:

- (a) Location of survey by one-fourth section, Township and Range.
- (b) The date of survey.
- (c) The surveyor's seal and original signature.
- (d) The surveyor's business name and address.
- (3) A permanent map must show the following:

- (a) Location of survey by one-fourth section, Township and Range.
- (b) The date of survey.
- (c) Scale of drawing and North Arrow.

(d) The distance and course of all lines traced or established, giving the basis of bearing and the measured distance and course to a monumented section corner, one-quarter corner, one-sixteenth corner or Donation Land Claim corner in Township and Range, or to a monumented lot or parcel corner or boundary corner of a recorded subdivision, partition or condominium.

(e) Measured bearings, angles and distances that are used as a basis for establishing or reestablishing lines or monuments separately indicated from those of record together with the recording reference. Metric measurements may be used if a conversion to feet is provided.

(f) Monuments set and their relation to older monuments found. A detailed description of monuments found and set must be included and monuments set must be separately indicated from those found.

- (g) The surveyor's seal and original signature.
- (h) The surveyor's business name and address.

(4)(a) Within 30 days of receiving a permanent map under this section, the county surveyor shall review the map to determine if it complies with subsections (1), (2) and (3) of this section and applicable local ordinances. A map must be indexed by the county surveyor within 30 days following a determination that the map is in compliance with this section. A survey prepared by the county surveyor in an official or private capacity must comply with subsections (1), (2) and (3) of this section.

(b) A survey map found not to be in compliance with subsection (1), (2) or (3) of this section must be returned within 30 days of receipt for correction to the surveyor who prepared the map. The surveyor shall return the corrected survey map to the county surveyor within 30 days of receipt of the survey map from the county surveyor.

(c) A map that is not corrected within the specified time period must be forwarded to the State Board of Examiners for Engineering and Land Surveying for action, as provided in subsection (11) of this section.

(d) An action may not be maintained against the county surveyor for recording a survey map that does not comply with this section.

(e) An action may not be maintained against the county surveyor for refusal to file a survey map that does not comply with this section.

(5)(a) When a survey within this state is funded entirely or in part by public funds and the survey results in the establishment of horizontal or vertical monuments for geodetic control, the registered professional land surveyor performing the survey, within 45 days after completion of the survey, shall file a report of the survey with the county surveyors of those counties where the newly established monuments are located.

(b) Notwithstanding paragraph (a) of this subsection, the governing body of a county may, by resolution or order, waive the filing of the report of the survey.

(6) A report required by subsection (5)(a) of this section may include maps or diagrams. The maps or diagrams, if included, must be referenced to each other. The report must contain the following:

- (a) The name and number of each newly established geodetic control monument.
 - (b) Location of newly established geodetic control monuments by Section, Township and Range.
 - (c) Location of the horizontal component of geodetic control monuments by the Oregon Coordinate [System as described in ORS 93.320 and 93.330] **System referenced in section 1 of this 2011 Act**, including the scale factor, combined scale factor, convergence and geographic or geodetic coordinates, indicating datum used.

The statement shall include the accuracy classification at the 95 percent confidence level for both network and local classifications in accordance with Standards for Geodetic Control Networks, Part 2 of the federal Geospatial Positioning Accuracy Standards (FGDC 1998) for the newly established monuments.
- (7) The county surveyor shall file and index reports that comply with subsections (5) and (6) of this section within 30 days of determining compliance.
- (8) A monument set by a registered professional land surveyor to mark or reference a point on a property or land line or to mark or reference a geodetic control survey point must be durably and visibly marked or tagged with the registered business name or the letters "L.S." followed by the registration number of the surveyor in charge or, if the monument is set by a public officer, the monument must be marked with the official title of the office.
- (9) If, in the performance of a survey, a registered professional land surveyor finds or makes changes in a public land survey corner or its accessories as described in an existing corner record or survey map in the office of the county surveyor, the surveyor shall complete and submit to the county surveyor a record of the changes found or made to a corner or accessories to the corner. The record must be submitted within 45 days of the corner visits, and must include the surveyor's seal and original signature, business name and address, and be on stable base reproducible material in the form required by the county surveyor.
