Subject: please Support for HB 3177 - and submit as testimony for public hearing

Greetings Committee Members,

I am a registered voter living in Ashland, OR.

I shop carefully when it comes to food, and I've been reading food labels for decades. Genetically engineered fish is NOT on my shopping list.

If they think it's OK to sell it into the marketplace, it is unfathomable to me that any purveyor of food would not disclose such information. It's a shame that legislation is required to accomplish this, but that is the reality we face. Please create a framework for allowing the consumer to make educated choices. Please support this simple labeling requirement by passing HB 3177.

Respectfully

Barbara Richard
