

Pregnancy Centers provide a much needed service for not only women but also families in our area. The pregnancy centers are completely professional, offer accurate, up to date information and respect women's rights. I have personally seen so many women who were at the end of their rope find hope, peace and a new lease on life through the help the pregnancy centers offer. They not only work with pregnant women but also offer marriage classes, parenting classes and nutritional classes. They help families in Oregon become stronger. Please support their essential services to the most marginalized citizens of this state.

Thank you
