

*I recently read about HB 3301 which gives EV owners an expanded "right to charge" in locations that may currently be restricted.*

*I urge you to support this bill.*

*An an EV owner, I am delighted with the experience and know that expanded access to charging will grow adoption. I know two people who bought Nissan Leafs based on my experience and recommendation. This common-sense bill will help the transition to clean fuel vehicles.*

*Thanks in advance for your consideration.*

*Best regards,
