**Subject:** SB 800

I am calling to register my opposition to SB 800, the bill will requiring pesticide operators, and state and local government entities, to send a copy of their spray record to the Department of Environmental Quality (DEQ) within 60 days of application. This is just red tape bureaucracy that will just add to private and governmental costs and not better help protect the public. Please instead focus on how to reduce unnecessary governmental regulation and expense.
