Subject: Approve SB 800

As John Sundquist so eloquently says:

In reality, personal health, children's health, community health, watershed health, forest health and economic health are inseparable. Oregon's current health protection schemes are failing all of these inseparable healths. In forestland regulation, the state currently prevents citizens from knowing when they will be at risk from poisoning or what poisons will be used. This is a huge issue--the current OHA Hwy 36 Exposure Investigation is only the tip of the iceberg.

SB 800 would allow citizens to find out what forest poisons they've been exposed to, knowlege essential to their health and their health-care providers. It is a small but essential step in the right direction, and I urge you to support it. Please support children's health, forest health and economic health--advance and improve SB 800.

*Please support and pass SB 800 for our collective health and wellbeing
Thanks for your help.*

Please support bill SB 800, We need to start addressing the issue of poisoning people everywhere.

The first step is informing people....

Please pass this bill, to many people are being poisoned and dont know why.

As John Sundquist says

"In reality, personal health, children's health, community health, watershed health, forest health and economic health are inseparable. Oregon's current health protection schemes are failing all of these inseparable healths. In forestland regulation, the state currently prevents citizens from knowing when they will be at risk from poisoning or what poisons will be used. This is a huge issue--the current OHA Hwy 36 Exposure Investigation is only the tip of the iceberg.

SB 800 would allow citizens to find out what forest poisons they've been exposed to, knowlege essential to their health and their health-care providers. It is a small but essential step in the right direction, and I urge you to support it. Please support children's health, forest health and economic health--advance and improve SB 800."

Please pass this bill

The next step, stop the spraying all together

Thanks
