Subject: pesticide legislative action

Beth Reiley

I would like to stand as opposed to the proposed legislation to add another step to the reporting requirement. Many of us farmers are GAP certified and we actively adding "on line" interactive programs such as that offered by Wilber Ellis. We are already accountable to our customers and the public.

We do not need one more level of bureaucracy - it will not improve the quality of our product, or our practices, - it will only cost taxpayers more money for repetitive paperwork.

Please consider us opposed to SB800
