Subject: HB 3135 CPR skills sheet

Dear Representative Gelser and Education Committee,
I'll be testifying Friday, April 5th on my bill HB 3135.

I'm sending you supporting evidence showing how child CPR works so you can be better prepared for my testimony at the public hearing.

I've attached the American Heart Association's CPR skills test sheet. This is the easiest way for you to understand that the protocols in Oregon's public schools violate standard child CPR guidelines set by the American Heart Association.

You'll see the difference between Adult and Child is clearly denoted on the test itself with the grayed-out fields on lines 4 & 11.

Line 4: "Tells someone to phone the emergency response number (or 911) and get an AED (for adult only)"

Line 11: "Instructor says, 'You have just completed 5 sets of compressions and breaths.' Leaves to phone 911 and get an AED (for child only)"

In Oregon public schools the guidelines are set up for the teachers to leave the child and activate the emergency response team and for the response team to start CPR on the child when they finally arrive, thus violating CPR standards set by American Heart Association.

Please let me know if you have any problem opening the PDF.
Thanks for holding the hearing. See you on Friday.

Thanks,
Dwon Guvenir, OR-EMT

Heartsaver® CPR AED Skills Sheet

American Heart Association
Heartsaver CPR AED
Adult and Child CPR AED
Side 1 of 2

Student Name: _____

Test Date: _____

Step	Critical Performance Steps	Adult CPR AED ✓ if done correctly	Child CPR AED ✓ if done correctly
1	Verbalizes that the scene is safe		
2	Checks for response—tap and shout		
3	Yells for help		
4	Tells someone to phone the emergency response number (or 911) and get an AED (for adult only)		
5	Checks for no breathing or only gasping <i>Minimum 5 seconds; maximum 10 seconds</i>		
6	Locates hand placement for compressions <i>Moves clothes out of the way of the chest Lower half of the breastbone; 1 or 2 hands for child</i>		
7	Delivers first set of compressions <i>Gives 30 compressions in 18 seconds or less</i>		
8	ADULT: Gives 2 breaths with a mask CHILD: Gives 2 breaths without a mask <i>At least 1 breath results in visible chest rise Breaths given and compressions started within 10 seconds</i>		
9	Delivers second set of compressions <i>Gives at least 23 of 30 compressions in the correct chest location</i>		
10	ADULT: Gives 2 breaths with a mask CHILD: Gives 2 breaths without a mask <i>At least 1 breath results in visible chest rise Breaths given and compressions started within 10 seconds</i>		
11	Instructor says, "You have just completed 5 sets of compressions and breaths." Leaves to phone 911 and get an AED (for child only)		
12	Turns on the AED immediately after it arrives		
<p><i>The next step is done only with a manikin with a feedback device designed to indicate when compressions are 2 inches deep (child) or more (adult) and/or indicate that chest recoil is complete. If no feedback device, STOP THE TEST.</i></p>			
13	Delivers third set of compressions of adequate depth <i>Acceptable if at least 23 of 30 compressions indicate a depth of at least 2 inches (adult) or about 2 inches (child)</i>		
		STOP THE TEST	STOP THE TEST
