

**Testimony Supporting HB 2919
House Health Care Committee**

April 8, 2012

Chairman Greenlick and House Health Care Committee Members,

Thank you for reviewing HB 2919 and I hope you will support it with a work-session and a “Do-Pass” recommendation.

I lead the technology development team creating the farm-site traveler system and shop floor data management system to track marijuana produced at an authorized farm through it’s harvest and processing steps until it reaches an authorized patient for medical-use. I support HB 2919 because it means excellent tech-type jobs leveraging best practices because HB 2919 integrates electronic lab data with patient medicinal targets and ultimately tracks their outcomes.

The transparency HB 2919 brings to marijuana in Oregon makes it the best solution in America. I adamantly support a responsible, trustworthy, robust marijuana industry. I’m proud to be part of this solution in Oregon. The real-time shop floor data management creates a transparent field-to-patient program, establishes dose and custody and empowers good-actors. It’s an innovative solution Oregon can be proud of.

Oregon needs a responsible and accountable marijuana program we can trust.

Enterprise level discrete manufacturing oversight systems protect and track the most valuable and important materials in America. They provide transaction and history ledgers, which creates proactive insight and stops illegal materials diversion. HB 2919 draws upon excellent operational experience and applies these proven manufacturing principles to the farm programs.

HB 2919 is an excellent legislative solution because it applies the right oversight using the right technologies.

Thank you for reviewing HB 2919 and I encourage you Chairman Greenlick and your Health Care Committee Members to support and pass HB 2919.

Respectfully,
