

House Bill 3114 would authorize all public universities, Oregon Health Science University or a community college to adopt a policy to regulate, restrict or prohibit the possession of firearms within and on the buildings and property the university or district owns or occupies.

So I a concealed weapon permit owner on campus at the same time a bad guy with an illegal gun is also on campus. The bad guy decides to go in the book store and starts killing people! Well we know he is not going to remember the new law let alone follow it!

I remember the law has been passed but stand by 2nd amendment, then shoot and kill the bad guy thus ending the slaughter. I do this before he can empty his "10 round magazine clip" which we all know doesn't really fire the bullets.

We also know he probably doesn't care there is a 10 round max law either because he has two thirty round, pre-ban clips he bought on the Internet. I have effectively stopped him from killing or wounding more people. I have protected my own life and that of others.

Do I get arrested and go to jail? Do I get charged for murder? Do I get fined for breaking House Bill 3114? Come on Peoplereally what are you truly trying to accomplish here besides imposing further gun control over law abiding citizens and participating in a feel good about yourself session?

This is not what the framers of the Constitution and the Bill of Rights had in mind. Nor is it what I pay outrageous taxes to have accomplished. As I see it, Taxes paying your wages and government time wasted trying to subvert what is already written into law in the Constitution and the Bill of Rights.

Maybe the House of Higher Education Committee should spend more time studying the US Constitution and why it was written, the true meaning of Tyranny and leave law abiding citizens alone.

Sincerely,
Morris L. Coville
Corvallis, OR
