Dear Members of the House Education Committee:

I am writing to ask you to support House Bill 3135. The purpose of this bill would allow a much needed update in the law regarding CPR training in schools. The physiology of a child is not like that of an adult. If and when a cardiac arrest happens it is critical that CPR be initiated in the first 2 minutes. This is the kind of training we hope no teacher ever has to use, but it could be the difference between life and death for one of their students.

Thank you for your support.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jay S. Rosenbloom', with a long horizontal flourish extending to the right.
