

Please vote NO on HB3251 and its sister bill SB12. These bills will adversely affect my ability to enjoy our great state with family and friends. These bills are NOT going to benefit anyone, other than maybe another forest ranger to try and enforce a new law. Oregon is financially unable to fund itself now, we sure don't need to hire anyone else.

These bills will slow down or stop tourists from coming to Oregon to spend money and enjoy our area. We need the tourists and their money to keep our economy alive.

Driving across a low water crossing in the middle of the summer has never been shown to harm the water or the fish or any other part of the environment. Same as dredging for gold. NEVER been proven to harm anything, but has been proven time and again to be a benefit to the life of the river and all the creatures that use it.

PLEASE vote NO on these bills.

Please be sure to include this letter of opposition to these bills in the public record.
