Subject: ACLU support for HB 2093- vital stats bill

Chair Greenlick and Members of the House Health Care Committee-

I see that HB 2093 — the vital records bill — is scheduled for a work session next week. I am writing to thank you for scheduling the work session and to lend our support.

HB 2093 makes some important improvements to the privacy and security of vital records, which as we know is very sensitive personal information. This bill is a welcome update to outdated laws in this area.

I thank you for taking up this bill and hope you will move it out of committee next week.

All the best,

Becky
