

Dear Legislator,

April 11, 2013

I am against issuing drivers license to those who are in our country illegally.

Our founding fathers weren't just men who had a firm understanding of history and the need for a **solid moral compass**. They knew what had failed in previous empires and countries.

Historically **all** nations subject to moral decay have passed into political and economic decline. Please don't ignore this.

America gave the world what was never before. Freedom, prosperity, self government and more. In all of history there had not been such a government.

All who try have the opportunity to succeed in relation to the effort spent. The nature of mankind **never** changes, and the need for this moral compass never changes.

Our Constitution addresses the **timeless truths** needed for maintaining the values to keep us a free, healthy and prosperous people. Sound laws were made in the past and lately an element is determined to turn upside down good laws and mores. Future consequences must be considered.

Our compass has broken; gone is plain common sense. Let's change that. We need to enforce current laws regarding illegal aliens and not tug at heartstrings with sad stories and ignore the real problem.

Selective enforcement of some laws and ignoring of others are illegal and a form of tyranny that leads to chaos. A disregard for this problem and the illegal ballot problem are foremost in the decay of good government.

Legislative business is for the good of all Oregonians and not for the benefit of only one particular Party, district or people.

For years, schools have been neglecting to teach our true and unique history and if we don't know what has been before, how will we know what we should be doing now?

Where is the knowledge and respect for rule of law if the problems connected with those here illegally is not addressed in a wise, honest and lawful manner.

Thank you,  
Lois O'Brien
