

Senate Committee on Business and Transportation:

Please make my testimony part of the public record. I'm testifying in response to SB844. I am opposed to legislation which would burden our public utility programs financially. Our economy is hanging by a thread. Now is the time for everyone and every organization to be fiscally responsible, not to take on new challenges.

Even if I did believe in climate change, now is not the time to address it. More spending for anyone would be the equivalent of throwing gasoline on an already out-of-control fire.

Respectfully,

Brittani woodruff
