

I am a small miner/pro prospector in Eastern Oregon and I support H B 2841. Oregon has a bad reputation with miners as a state that discourages mining. If there is any way to change that, please help. I have mined in Nevada and Calif...just small mining and am going to try to find a few flakes here in Eastern Oregon. I'm 79 years old so this may be my last year of fun out there mining.
Thank You for your help
