Subject: Stop dredging on the Rogue

Dear Ms. Reiley,

I'm writing this to urge the legislature to **stop** dredging on the Rogue River. As a citizen and fisher, I watch the numbers of fish decline year after year. Silt that covers fish eggs plays a part in that. We have a higher calling in this state to preserve the natural habitat for all time over allowing the selfish interests of those that would befoul the rivers for their own, short-term gain. We owe it to the generations to come, ours and that of all the organisms our actions impact, to responsibly steward the water and the riparian habitats. Dredging in water is antithetical to our state's best interests in the long term. Please vote against allowing dredging in the Rogue River and basin on SB 838.

Yours, truly,

Gail R. Campbell
