Senate Committee on Business and Transportation  
RE: Please vote **NO** on SB844

Dear Senator Beyers and Committee Members:

Please vote no on SB844 which suggests that global climate change is affected by mankind. This is a fraud. Global climate change has been undergoing natural variation for centuries. The environmental community does not even speak of global warming anymore. The reason for this is that they know that the global warming trend reversed about 18-years ago. Earth is now in a undergoing a cooling trend.

The best evidence I can supply you with is a recording from the Washington State Senate Committee on Energy, Environment and Telecommunications. The testimony was provided on March 26, 2013 by Dr. Don Easterbrook, Professor Emeritus of Geology, Western Washington University.

If you ever wanted to learn the full truth of what was GLOBAL WARMING but which is now labeled GLOBAL CLIMATE CHANGE listen to the presentation at the link on the bottom of this page. Dr. Easterbrook lays out the truth based upon unadulterated scientific facts.

Dr. Easterbrook exposes the flawed computer models that exaggerate measured temperature readings to "homogenized" temperature readings. We in science call that garbage in, garbage out.

The most damning thing I heard him say was that ONLY global warming science is being published in the prestigious scientific journals because the editorial boards will not accept publications containing scientific fact that global warming is not occurring.

His presentation contains all the graphics of scientific fact you would ever find in one excellent presentation.

The Senate spent the first 10 minutes on housekeeping prior to Dr. Easterman's presentation. The slider at the bottom of the screen can be moved to the right to bypass this time. This presentation, with questions, is about an hour and 20 minutes long. However, after listening to this you will not have to waste anymore of your life fearing for the survival of mankind.

Peer reviewed science is a fraud, regardless or the quality of the work, if only one side of the story is selected for presentation to other scientists or the general public.

Please make this testimony a part of the public record.

Washington State Legislature 2013-2014 Session

[Senate Energy, Environment & Telecommunications Cmte.](#)

March 26th, 2013, 1:30PM

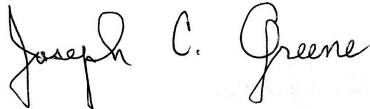

Senate Hearing Rm 4

Public: SHB 1314, SHB 1498, EHB 1826; **Work Session: Climate change.**

**Dr. Don Easterbrook, Professor Emeritus of Geology, Western Washington University**
