Dear Beth,

I'd like to go on record opposing State bill's 401 & 838.

They place unfair and unecessary restrictions on a well governed mineral industry. This legislation is typical of Oregon with lots of good intentions for the public but no responsibility is taken to compensate those who loose property or it's legitimate use. When you read this please remember where the precious metals inside your computer and cel-fone have come from. Dogami does an effective job of regulation that is strict but fair to both parties as is.

When the well intentioned eco-people agree to take responsibility to compensate for their legalized theft of private property then we can talk fairly about further restrictions.

Thank you, Robert Hearst
