I strongly support this piece of legislation. I live almost 3 miles from the NW industrial area in Portland. I have been awakened in the middle of the night by strong toxic fumes coming in the window in the summer. Many times during the year, there is a strong smell of asphalt in the air in the morning when I go out to get the newspaper. I live near the top of a hill in a completely wooded residential neighborhood next to Forest Park and nowhere close to any major transportation corridors. This toxic air can only be coming from the industrial area in NW Portland. It is a disgrace that a state whose reputation as an environmental standout, attracting many tourists and new businesses every year, has allowed this situation to persist. Please move this bill out of committee and let's get some legislation passed before Portland becomes known as the Gary, Indiana of the Northwest!
