

Dear Legislators,

I have been living in NW Portland across from Forest Park and near Chapman school for 18 years. The industrial odors and air quality is so bad some days it is suffocating. The fact that DEQ can't or won't act on this and that industrial leaders won't change their ways is unconscionable. Our children will pay dearly for this. Are we waiting for the rising cancer epidemiology or pulmonary disease rate of our children to emerge before we act?
