The Effects of Good Faith Legislation (R-67)

Claims versus Realities

The Opponent's Claims

- "Milliman found when states altered bad faith laws insurance premiums increased 3.5 to 7 percent more than the national average."
- "Assuming the national average for insurance premium increases is 5 percent the (Milliman) study predicts Washington's premiums could increase up to 12 percent, costing Washington consumers \$650 million annually."
- "(R-67) applies to claims related to homeowner's insurance, auto insurance, long-term care insurance, property insurance, malpractice insurance and small business insurance."

Washington Research Council Policy Brief October 22,2007

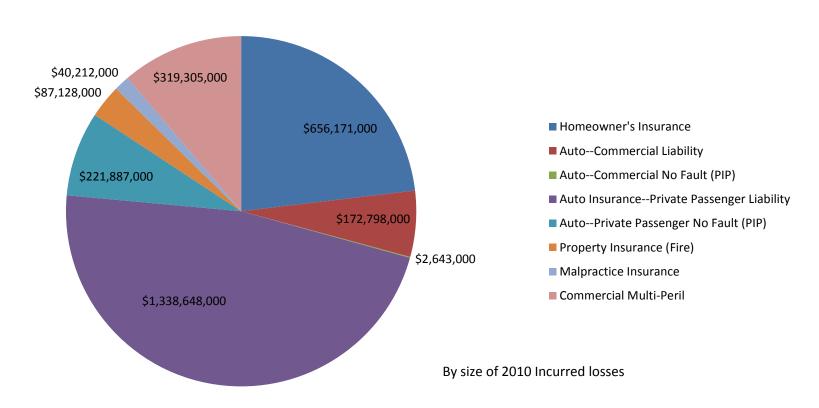

Post Election Claims

- "Excess UM (uninsured motorist) loss costs attributable to R-67 may have totaled as much as \$17.4 million during the first two years following enactment."
- "...an additional \$190 million in homeowner's coverage loss costs—approximately \$50 per insured home— in the first two years of R-67."

From "The Impact of First-Party Bad-Faith Legislation on Key Insurance Claim Trends in Washington State" --Insurance Research Council (February 2011)

A little background

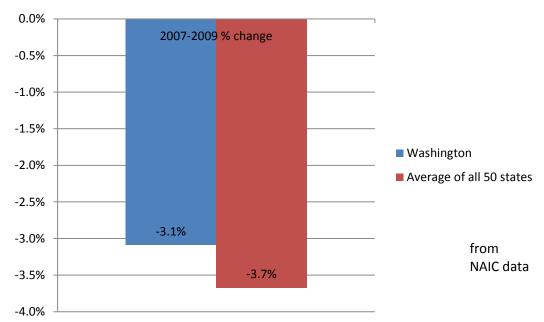

Primary Washington Insurance Sectors affected by R-67

Early Indicators

Auto

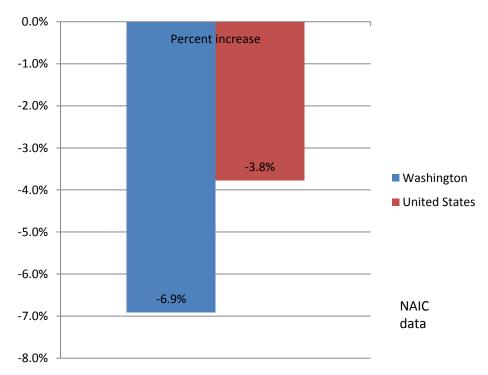

Change in Average Auto Insurance costs per car (2007 to 2009)

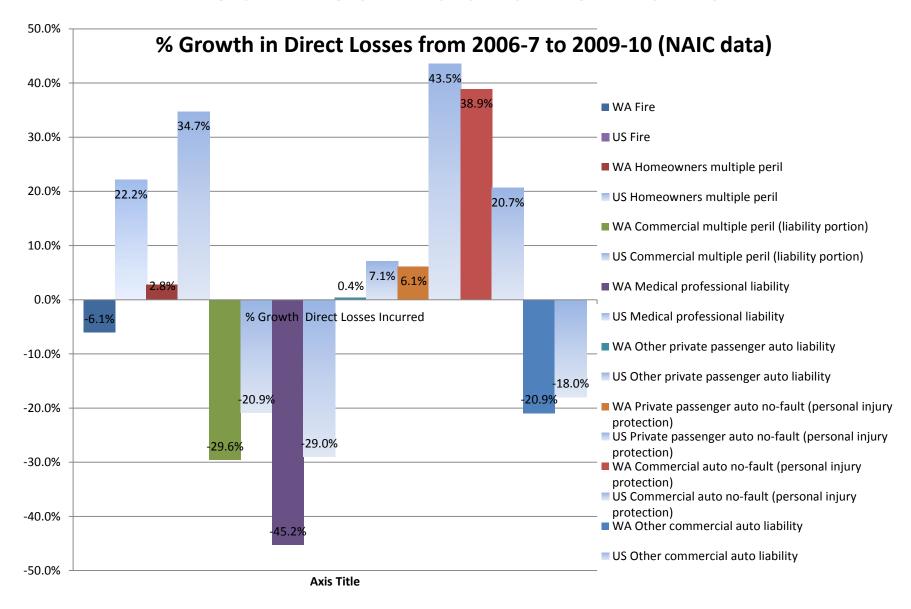

Early Indicators

Homeowner's Insurance

Change in average homeowner's insurance premium from 2007 to 2008

Realities—data to 2010

Conclusion

Overall Washington outperformed the national trend in the R-67 affected sectors
