First and foremost, health care is a human right. But that assumption has been buried by the profit motive that has overtaken the system. Health is no longer its primary purpose. It has become an "industry" with focus on market share strategies and strong armed lobbying of captive legislators. People's choices are shuttled away because of someone else's bottom line.

The grassroots recognizes the health care is a human right. It's time for our "representatives" to follow.
