

Accepted disabling claims for lifting (221) by ownership and industry ¹

	Hospitals (622)			Residential Care (623)		
	2009	2010	2011	2009	2010	2011
	Private	64	56	60	75	72
Public	4	4	11	0	1	1
Total Claims	68	60	71	75	73	85

*Excludes Oregon State Hospital claims

Claims rates* for lifting claims (221) in hospitals and residential care facilities, 2009-2011 - Private Industry ²

NAICS	EMP	Claims Rate (2009)	Claims Rate (2010)	Claims Rate (2011)	All 3 Years
622 (Hospitals)	53,214	0.120	0.105	0.113	0.113
623 (Res. Care)	44,033	0.170	0.164	0.191	0.175
Diff	-	(0.050)	(0.058)	(0.078)	(0.062)

*Rates are per 100 workers.

Type of Employer	NAICS	Emp
Hospital	622*	60,976
- Private		53,214
- Public		7,762
Res. Care Facility	623*	45,470
- Private		44,033
- Public		1,437

¹ Claim counts represent all accepted disabling claims received by DCBS during that year for lifting events.

² Employer and employee counts are from the Oregon Employment Department OLMIS system.

The reports used were the "Covered Employment and Wages Summary Report - Oregon Statewide - 3rd Quarter 2012," which compiles data on businesses whose employees are covered by unemployment insurance and the "Industry Report - NAICS 623, Ownership: Private Sector" to provide most recent employee counts.

NOTE: The Employment Department data and the Workers' Compensation data come from two different data systems. There is incompatibility between the two data systems.

***** Please note - lifting is a specific OIICS event code (221) and only one of several subsets relating to overexertion claims. Additional claims for physically handling or attempting to move a patient could be coded in bodily reaction, repetitive motion, and other type of overexertions.
