To whom the decision below rests on,

S&H purposed facility will be for the benefit of one S&H Logging and the frustration of all. I have lived in the same home up high on Sweetbriar Rd. since 1964 and have a 495' well with no filter of any kind and can put my water in a clean container and it will be still drinkable after a year or more. As you can see my first concern is water purity for the schools, churches and homes closer to it and lower down than myself.

Turning 71 years old today please give me a birthday present to help others to prevent the problems that my not become apparent upfront until it is to late and the soil,water and air is contaminated.

KATHLEEN ROLES 21515 S. SWEETBRIAR RD. WEST LINN, OR 97068
