Subject: HB 3342 Public Employee Unions

Honorable Committee Members,

We wish to go on record against this legislation. This bill, if passed, would create and open a Pandora's box for new class of Americans that are protected from any unseemly act much like royalty was in history with no consequences to face. No one opposes the King and with this legislation no one opposes the public unions. Since when in America do we exclude anyone from responding to and defending themselves, including public employers. Do the unions feel they cannot operate unless they are free to without objection from the accused?

Sam and Karen Villalobos
