Subject: Bills about GE foods

I support HB 2175, HB 2532 and HB2530
I am totally against SB 633.

I think genetically engineered food is the biggest fraud ever perpetuated on the American people. The only studies that have been done are done by the industry so the health effects are not known but we are the unhealthiest countries around and strangely one of the biggest producers of GE food. Oregon is known for its organic food especially in Southern Oregon with our premier food co-op, the third largest grossing co-op in the country and GE food will destroy that industry. Do not believe anything said about being able to keep them separate. I grow my own food and I see everyday how plants work. It is time to stand up to the big biotech food industry who control a large proportion of the worlds' seeds and who have never promoted any kind of pinning system anywhere. I have been in Oregon for 27 years and I love this adopted home. Please do the right thing.
