

To whom it may concern:

I am writing this letter to urge opposition to SB 132. This bill is not only unconstitutional, but it is being pushed through using propaganda by those who should not be making medical choices for my children. As the parent of a severely disabled child due to vaccine injury, I know the real risks of adhering to a vaccine schedule that has never been tested. As a Christian, I do not believe the government should have the authority to tell me to I have to inject questionable ingredients such as aborted fetal tissue, other animal tissue, poisonous formaldehyde, and heavy metals like mercury or aluminum into my children's bodies. After years of research reading books, watching lectures, and talking to other parents with our story and values, I have learned the risk of infectious disease in our country has been grossly exaggerated while the risk of vaccine injury has been just as grossly under-reported and neglected. Most parent's I know who have been through similar ordeals have done similar research and should not need to go through excessive hoops to do what they feel is right for their children. No lecture or class will change my convictions. I love my kids. I know the choice I have made for them is the right one. Please, no on SB 132. Thank you for your time.

Sincerely,
Erin Barker
