

Dear Senator Shields and Rep Kotek,

I am writing you again to ask that you oppose the Columbia Double Crossing.

I appreciate that it is in the nature of politics to engage in horse trading, but it's hard for me to imagine any reciprocal goals worth this devastating pork barrel project, its reward to greedy road-construction fat cats, the great burden on public debt in a time when the economy could collapse further, the environmental hardship on already-stressed North Portland, and the incalculable effects on climate chaos--from the greenhouse emissions in the manufacture of steel and concrete, not to mention the increased traffic.

As always, thank you for your very intelligent and good-hearted leadership--it is appreciated.

Ciao,

Mitch Gould, Roger Moss
