

Dear Mr. Brennan;

I would like to submit written comments in lieu of public testimony regarding the CRC project. I am deeply concerned about the rush to develop the CRC I-5 bridge project. Despite all its fanfare this project is ill-conceived does not pass the sniff test. What is the rush to ram this through when there are obviously viable alternatives that should be considered. Specifically, I refer you to this video:

[Columbia River Crossing : Alternatives on Vimeo](#)

I urge the legislators to seriously consider other alternatives to this white elephant.
