

Outdoor School Review

Sam Sanyon
May 17-2011

Wow, outdoor school changed my life! I didn't thought learning could be this fun. No one can tell you the experience until you do. Sing songs, eating great food, cabin time, field day! Doing all that in one day can make a person tired, but if I could have that experience again I'll take it. That's why if I went back as a student leader my name would be: Krispy. I love my food crispy and its catony.

The field study I would pick is Water & Plants

Plants: I choose plants as one of my choices because I love the outdoors and plants is one of the things that make earth, the earth. Green and blue, the green you see is trees and plants. Well I bet your wondering how did trees get that high? Well I'm the guy for plants!

Water: Water the other most natural resource on earth. And if you want to keep it like that we need to use our water better. So who better to help and teach you that's me! Krispy.
