Dear Senator Bates,

Please find a way for yourself to end up opposed to SB 633 - which would pre-empt county regulation of agriculture.

There will be creative initiatives from some counties that can have tremendous consequences, positive contributions, to maintain and grow patch development in agriculture.

I want you to consider the likelihood that SB633 is coming from the chemical industry and flies in the face of our traditional farming and consumer health & choice.

Thank you Kindler Stent
