

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. For example, what's appropriate to Josephine is not necessarily appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic and agricultural future.**

, Date 3-7-13

I am a registered voter in LANE County, Oregon
Please submit as testimony for public hearing.

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Please submit as testimony for public hearing.

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Signed:  _____, Date 3/8/13

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Please submit as testimony for public hearing.

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Please submit as testimony for public hearing.

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. For example, what's appropriate to Josephine is not necessarily appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic and agricultural future.**

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. For example, what's appropriate to Josephine is not necessarily appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic and agricultural future.**

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**

Andrew Brown, Date 3/11/13

I am a registered voter in Josephine County, Oregon
Please submit as testimony for public hearing.

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. Please oppose SB633 so our county can maintain control of our regional economic future.

Oppose Senate Bill 633

The broadness of SB633 ignores local issues of economic viability which are best handled by local control. Contrary to the idea that a "patchwork" of local regulations will stifle growth, it is precisely the process of making decisions at the local level that best serves the unique conditions of our various counties. What's appropriate to Josephine is not appropriate to Lane. Seed and agricultural issues are unique to each climate, culture, and business community. **Please oppose SB633 so our county can maintain control of our regional economic future.**
