1515 N COURTHOUSE RD, SUITE 610
BALTIMORE, MD 21202

Last Month Neighbor Comparison

You used **19% MORE** energy than your efficient neighbors.

* This energy index combines electricity (kWh) and natural gas (therms) into a single measurement.

How you're doing:

Great 😊 😊

GOOD 😊

More than average

Who are your Neighbors?

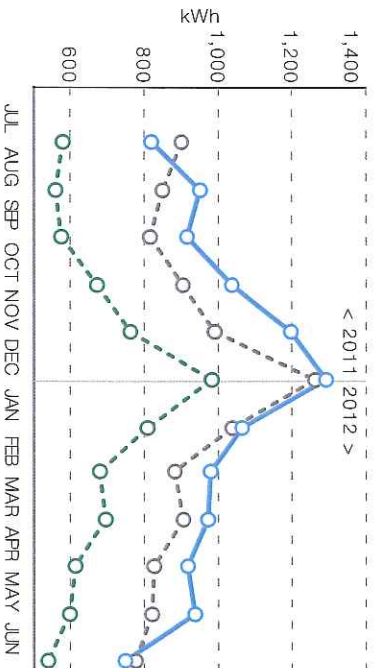

■ **All Neighbors**
Approximately 100 occupied, nearby homes that are similar in size to yours (avg 2,651 sq ft) and have both electricity and natural gas service

■ **Efficient Neighbors**
The most efficient 20 percent from the "All Neighbors" group

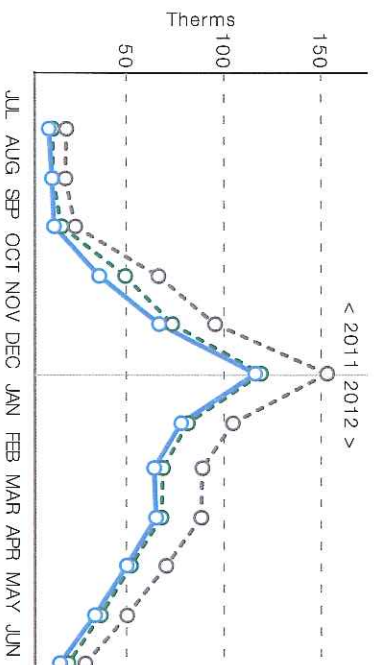

Last 12 Months Neighbor Comparison

You used **20% MORE** energy than your efficient neighbors. This costs you about **\$305 EXTRA** per year.

⚡ **Electricity** | 47% more electricity than your efficient neighbors

🔥 **Natural Gas** | 8% less natural gas than your efficient neighbors

Action Steps | Personalized tips chosen for you based on your energy use and housing profile

Quick Fix

Something you can do right now

Smart Purchase

Save a lot by spending a little

Great Investment

A big idea for big savings

Hang laundry to dry

Your clothes dryer is a major energy consumer, because it has to produce so much heat. You can save by using the sun's heat instead.

Install a programmable thermostat

A programmable thermostat makes it easy to save energy while keeping your home at a comfortable temperature.

Get cool savings with a new refrigerator

Your refrigerator runs 24 hours a day, seven days a week. As a result, it uses more electricity than most other appliances.

Use clotheslines or drying racks to air-dry clothes on warm days. Hang-drying uses no electricity and is gentler on clothes than repeated cycles in the dryer. You can also choose to dry on indoor racks.

To soften up your dry clothes, you can throw them in the dryer for about five minutes.

A programmable thermostat can automatically change the temperature of your home temperature to an energy-saving level when you are away from home or sleeping. The temperature will automatically return to your chosen comfort level when you are home and awake. You choose the temperature settings and schedule that are right for you.

You could save 40% or more on its energy costs when you replace a refrigerator that is at least eight years old with an efficient ENERGY STAR® unit. Remember that models with a freezer on the top or bottom are generally more efficient than side-to-side models.
