Subject: Senate Bill 633

Greetings,

I am writing to voice my opposition to senate bill 633. I believe it is crucial that individual counties are able to self regulate the type of agriculture that they will allow. Large biotech companies have recently been invading the rogue valley and their presence causes pollen drift for 4-6 miles, thus contaminating any organic seed farms nearby within our valley which is only 4-5 miles wide. The GMO presence here is endangering our organic farming culture in southern Oregon.

Thank you
Tenasi
