

3/13/2013

To whom it may concern:

I just became aware of proposed legislation (SB 578) that concerns the mushroom industry and read the draft of the bill.

My understanding is that time is of the essence in responding to the proposed legislation so I am going to keep this brief. Due to the vagueness of the bill and lack of any viable reason to even propose such legislation, I am strongly opposed to the passage of this bill. In the face of destruction of habitat and lack of bio-diversity leading to a declining industry, it seems that the attention of the legislature would be better directed elsewhere at this time.

Sincerely,

Perry Bergman
