To whom This May Concern:

Being a past member of OIDA, past President, Board member, and Current member of the OVDA, I can't understand why DMV would oppose taking the mileage information of the titles of all Oregon cars. It seems to only make sense to add more years to titles, because automobiles last longer than they did in earlier years. It took years to get legislation in Salem to listen to our concerns about mileage discrepancies on our autos. We finally got a senator to listen, we also received help from other representatives in Salem to finally get mileage readings on titles. why wouldn't we want to extend this policy to 22 years. Car Fax will provide long time history reports. This helps the consumer and the dealer. To me this is a NO BRAINER policy that should be done now.

Sincerely,

Bob Nichols Auto Sales
