

HB2787

*You are dreaming  
with our money*

There is probably little we can say that will influence you since you are not listening to Citizens, nor representing our interests. By pushing this forward you have shown that you are representing the interests of the new group you have chosen to reward for the moment.

You are arbitrarily choosing to favor those who have broken the law, for what purpose remains to be seen. If you are trying to bankrupt the American people you are doing a good job of it.

Slave owners, like Thomas Jefferson, inherited their slaves with contracts on their heads from the poor choices their fathers made, often living beyond their means and laying the burden of working for the creditor on the back of a slave. You are doing this to us. Don't judge Jefferson hard, or you will judge yourself. Your poor choices burden us with a tax burden that benefits each new beneficiary you choose ahead of equally building up the ability of each American to build their own lives. These poor souls will possibly find themselves to be your slaves in the future, when you choose some other group to favor for your political advancement.

George Washington said, "Arbitrary power is built on the ruins of liberty abused to licentiousness." You are giving yourself the permission to create law, just as you please, for your own power.

As the black slaves say, "LORD, have mercy!" We already know we will not find it at your hand.

*Rebecca Roth*
